PIYUSH SHASHIKANT SHINDE

Data Engineer | Big Data Analytics | AI Engineering
Navi Mumbai, India | +91 8600461479 | piyush25107@gmail.com | LinkedIn | GitHub

Professional Summary

Data Engineer with experience building real-time pipelines that process, clean, and analyze millions of records. Has worked on streaming analytics systems, AI applications, and machine learning models deployed on mobile devices. Also brings professional experience in data validation, prompt improvement, and model output quality.

Education

Post Graduate Diploma in Big Data Analytics Completed Aug 2026
C-DAC Kharghar, Navi Mumbai

Bachelor of Engineering – Computer Engineering Jun 2025
Sinhgad Institute, Savitribai Phule Pune University | 7.74 CGPA

Professional Experience

Zensar Technologies Sep 2025 – Feb 2026
Junior Associate Process Executive – AI/ML Data Operations

- Validated and labeled 10,000+ records for ML and generative AI workflows, sustaining 98% accuracy against strict SLA requirements.
- Refined prompts across 3+ iteration cycles and audited 1,000+ model responses to improve relevance, clarity, and factual consistency.
- Resolved 300+ annotation inconsistencies and tracked 4 quality metrics to strengthen training data reliability.
- Delivered 100% of validated datasets on schedule across 5 monthly cycles, improving downstream model performance.

Technical Skills

Languages: Python, SQL, JavaScript, Dart.
AI/ML: Machine Learning, PyTorch, scikit-learn, Pandas, NumPy, LLMs, RAG, Embeddings, Semantic Search, LangChain, LangGraph, Ollama, Qwen, Whisper ASR, ONNX Runtime, Vector Databases.
Data: PySpark, Apache Spark, Spark Structured Streaming, Kafka, Airflow, Hadoop, Hive, PostgreSQL, Redis, Neo4j, ChromaDB, MinIO, AWS S3, Power BI, Tableau.
Tools: Flask, React, Docker, Linux, Git, GitHub.

Projects

Real-Time E-Commerce Big Data Analytics Pipeline GitHub

- Architected streaming infrastructure for 2M+ transactions leveraging Kafka, HDFS, Spark Structured Streaming, Airflow, and PostgreSQL.
- Executed 30+ transformation rules, converting raw inputs into 1.12M clean entries served via Flask REST APIs and a Plotly dashboard.
- Quantified INR 583.45 crore revenue across 441K+ customers and containerized the ecosystem with Docker Compose.

Intent-SLM: On-Device Intent Detection and Slot Filling GitHub

- Engineered an offline NLU model for joint intent detection and slot filling via PyTorch, MiniLM, and INT8 quantization, reaching 98.43% accuracy and 95.62% F1.
- Compressed the network to 34 MB and deployed natively on Android through Flutter, ONNX Runtime, Whisper ASR, and Dart tokenizers.
- Integrated BIO-constrained Viterbi decoding across 72 slot labels, raising exact-frame accuracy from 89.00% to 89.86%.

DakshAI – Multi-Agent Startup Intelligence Platform GitHub

- Constructed an advisory platform integrating a 9-model ML ensemble with Django, React, PostgreSQL, Redis, Celery, Neo4j, and local Qwen models.
- Formulated a 3-stage retrieval pipeline combining SearXNG, dense embeddings, and graph databases across 18 sectors for grounded guidance.
- Programmed asynchronous document tracking and compliance routing via 6+ REST endpoints, 3 Celery pipelines, and MinIO storage.

Achievements and Activities

- **1st Place, C-DAC Hackathon** – Recognized for system architecture, backend development, and technical presentation.
- **Maharashtra Sports Champion** – Awarded a state-level certificate for endurance, discipline, and competitive execution.
- Participated in 5+ hackathons, blockchain events, and state-level sports competitions.

Certifications

- AWS Academy Graduate – Cloud Foundations
- AWS Academy Graduate – Data Engineering
- Product Management and Agentic AI – IIT Patna–Masai
- NPTEL – Software Conceptual Design
